

# ManEx Minute

Take a minute to save time with ManEx.

**Dear Valued Customer,**

Did you know that ManEx allows users to control the customer AVL at the Bill of Material (BOM) level as well?

After setting the customer's AVL in the Inventory Control Module, users are able to further restrict the customer's AVL for a specific BOM.

By opening the desired BOM and selecting the "AVL & Reference Designator" tab, users are able to check and un-check manufacturer part numbers as needed. This will ensure that the selected BOM will only allow the specified manufacturers in kitting and production.

To learn more of the great features in the module, please refer to the [Integrated BOM & AVL Manual](#).

This is just another way we are developing ManEx with YOU in mind.

Sincerely,

*David Sharp*
