

ManEx, Inc.

Developing with YOU in Mind

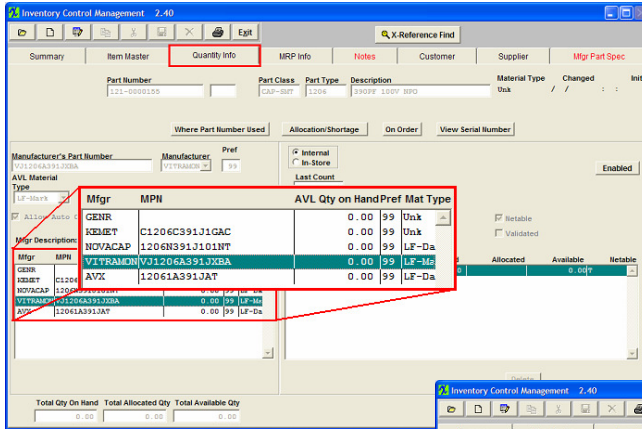

# ManEx Minute

Take a minute to save time with ManEx.

**Dear Valued Customer,**

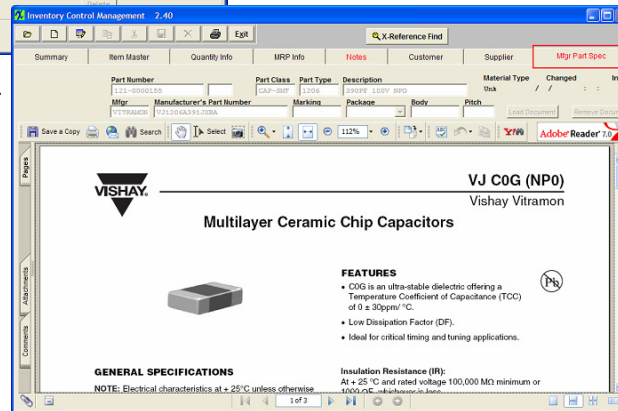

Did you know that ManEx allows users to store and access manufacturer drawings within the Inventory Control Module?

Users are able to load and view drawings in the inventory control module by selecting a manufacturer from the list on the "Quantity Info" tab and then selecting the "Mfgr Part Spec" tab.

Each manufacturer part number listed on the internal AVL can have a separate drawing loaded in the item master.

Because ManEx uses the native application for viewing, the attached files can be in almost any file format (Excel, Word, PDF, PPT, JPG, CAD, etc). This capability removes the requirement for hard copy drawings and places this critical information at the user's fingertips.

Additionally, in v9.1 we added a related documentation option to the Inventory Control Module. This will allow users to attach multiple files and file types to each internal part number and control the document name and revision for each file associated with the internal part number.

To learn more of the great features in the module, please refer to the [Inventory Control Management Manual](#).

This is just another way we are developing ManEx with YOU in mind.

Sincerely,

*David Sharp*
