

ManEx Minute

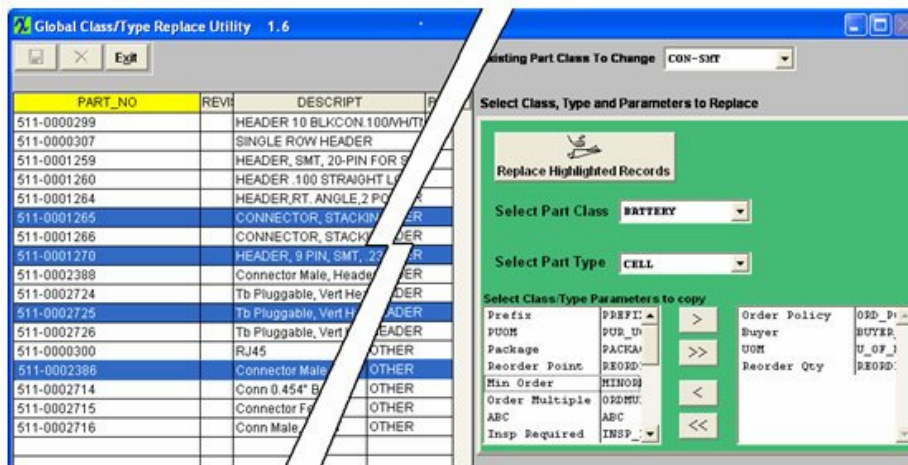

Take a minute to save time with ManEx.

Dear Valued Customer,

Did you know that ManEx has many powerful utilities to increase system functionality and user capabilities?

One Example is the "Global Class/Type Replace Utility". Users can access this module in the system utilities under System Utility / Inventory Maintenance by Part Class & Type / Inventory Class/Type Replacement.

From this screen, users are able to select existing parts and modify the attributes as needed. ManEx will change the desired parameters (and part numbers if desired) to match the specified class and type with the click of a button.

By giving users this control, ManEx has simplified the inventory maintenance and allowed users to ensure their item master list is clean and accurate.

This is just another way we are developing ManEx with YOU in mind.

Sincerely,

David Sharp
Regional Vice President
