

# ManEx Minute

Take a minute to save time with ManEx.

**Dear Valued Customer,**

Did you know that ManEx gives you the ability to optimize your part delivery schedule to reduce lead times and maximize inventory control?

For complex assemblies, some components or sub assemblies may not be required until late in the production process. The "Production Offset" field allows you to specify how long this delay should be. This enables MRP to schedule this part the specified number of days AFTER normal production begins.

The result is a shorter assembly lead time and better inventory control. For example, if you have a part with a twelve week lead time and a production offset of three weeks the total assembly lead time will be reduced by those three weeks!

For more information on the Shop Floor Setup please refer to the [Bill of Material](#) Manual.

This is just another way we are developing ManEx with YOU in mind.

Sincerely,

David Sharp  
Regional Vice President  
ManEx, Inc.  
7282 55th Ave. East  
PMB 162  
Bradenton, FL 34203

1 DPMO reporting requires the optional SQC module, and labor reporting requires T&A and JC modules.
