

ManEx Minute

Take a minute to save time with ManEx.

Dear Valued Customer,

Did you know that ManEx v9.4 will allow you to control if a particular AVL can be purchased or kitted?

Not only can users track the quantity on hand by manufacturer, but they are now able to indicate if a manufacturer part number is available for kitting or purchasing.

Inventory Control Management 2.75

Summary | Item Master | **Quantity Info**

Part Number: 101-0000002 | Part Class: RES-SMT | Part Type: 0805

Where Part Number Use

Manufacturer's Part Number: 54232165132 | Manufacturer: ABCO | Pref: 99

AVL Material Type: RoHS | AVL Material Value: 08/15/06 | Add AVLs to Consign

Allow Auto Creating Location at Receiving (selected)

Disallow this part from Purchase Kitting

Users control this setting on the Quantity Info tab. Checking or unchecking the disallow this part from Purchasing or Kitting box will control whether the selected AVL will be visible or hidden in the Purchasing or Kitting screens respectively.

This is a great way to consume inventory on-hand that is going obsolete while preventing the purchase of more.

This will also prevent users from kitting any approved AVL that is

temporarily placed on hold for any reason.

For more information on Inventory Control Management, please refer to the [Inventory Control Management](#) Manual.

This is just another way we are developing ManEx with YOU in mind.

Sincerely,

David Sharp
