

# ManEx Minute

Take a minute to save time with ManEx.

## Dear Valued Customer,

Did you know that ManEx v9.4 will allow you to create your own material type designations for each part manufacturer?

In the system setup under Material/Material Type Setup and Material Type Setup tab, users are able to define their own material type designators to be used on the manufacturer part number level.

AVL Material Type	
LF	Lead Free
LF-Date	Lead Free-Date
LF-Mark	Lead Free-Mark
LF-P/N	Lead Free-P/N
PB	LEADED
RoHS	RoHS
RoHS-Date	RoHS-Date
RoHS-Mark	RoHS-Mark
RoHS-P/N	RoHS-P/N
Unk	Unknown

  

AVL Material Type
<input type="text" value="LF"/>
AVL Material Type Description
<input type="text" value="Lead Free"/>
<input type="button" value="Add"/>
<input type="button" value="Delete"/>

Several Material Types are pre-loaded such as LF and RoHS, but users are now able to create their own as needed.

For each Manufacturer Part Number in ManEx, users will also be able to load additional information related to each AVL Material Type in the "AVL Material Value" field in the Inventory Control Management Module on the Quantity Info tab. This can be the markings, date, or other related information to the Material Type classification.

By allowing users to control their own Material Type, ManEx can fulfill current and future needs for AVL designation and classification.

For more information on Inventory Control Management, please refer to the [Inventory Control Management](#) Manual.

This is just another way we are developing ManEx with YOU in mind.

Sincerely,

David Sharp  
Regional Vice President

ManEx, Inc.  
212 East State Road 73 #162  
Saratoga Springs, UT 84043
